

Parent Care Online Course User Guide

powered by

Teen Driver
Blueprint

This guide will walk you through how to access and use the online courses offered through the **Teen Driver Blueprint** program to help you supervise your new driver while they gain the experience they need behind the wheel for them to become a safe, confident driver. Driving is one of the riskiest activities they will engage in during their life; together with effective training and **your coaching and support**, we can greatly reduce their risk!

Coaching from the Passenger Seat

A Guide for Parents During the Learner's Permit Phase

As parents, we spend thousands of hours teaching them to read, write, play sports, instruments and many other activities, **yet we often take for granted the instruction and practice needed for the activity that will hold the most risk to them in their lifetime...driving!**

This online course includes 12 essential behind the wheel lessons taught by veteran crash investigator, Mike Pehl. Mike uses his unique perspective and engaging, no-nonsense teaching style to walk you and your newly permitted teen from the first discussion to lay the ground rules all the way to licensing day. This course is self-guided and we encourage you to go through the course with your new driver at the right pace for you. Each lesson can be watched as many times or as much as you need or would like. If you have already started supervising your new driver, feel free to review the first lessons and skip to the section appropriate to your progress.

As part of all state licensing processes, it is required that your teen complete a specific number of hours of supervised driving, some of which must be at night prior to becoming licensed (see Driver Experience Log on next two pages). **It may be a requirement of your state, but the real value of supervised driving is to give your teen as much experience in as many different driving situations as possible.**

The Teen Driver Blueprint team is committed to helping you and your new driver gain the valuable experience they need prior to driving on their own. Feel free to print or fill in electronically the Driver Experience Guide* on the next pages to chart your progress and ensure you have covered all of the practice and situations they need to be great. (*For supplemental use only, consult your DMV for official driver logs as may be needed.)

Danger Zone Training

Post-License Course for New Drivers

“National Highway Traffic Safety Administration statistics show that nationwide, 43% of first year drivers and 37% of second year drivers are involved in crashes.”

The Centers for Disease Control has studied and determined the top “Danger Zones” of novice driver collisions and this course has been specifically designed to help new drivers navigate around these situations. The following Danger Zones are specifically addressed in this course:

- ✓ Distracted Driving
- ✓ Speeding
- ✓ Impaired Driving
- ✓ Driving at Night
- ✓ Driving with Teen Passengers
- ✓ Non-use of Seat Belts
- ✓ Drowsy Driving
- ✓ Driver Inexperience

Danger Zone Training is the first post-license online course using a drip-learning technique to help new drivers retain important driving messages during the critical first six months of solo driving. In this course, Mike instructs new drivers using video, stories and dash cam footage to keep your new driver informed in an engaging manner. Each month, after your teen receives their license, they will receive two lessons, the first discussing one of the top danger zones and the second a short dash cam lesson which examines a scene from the footage and how to avoid it out on the road.

Don't stop training just because they have received their license, ensure that they continue to stay aware and keep learning during the most critical phase of their driving career!

See the next pages for instructions on the best use of the course platform on your devices.

- 1 Dropdown menu to choose course
- 2 Dropdown menu to choose lesson
- 3 Dropdown menu to change password, settings or log out
- 4 Click to begin playing lesson
- 5 Indicates lesson has been watched
- 6 Click to watch lesson
- 7 Click to advance to next lesson
- 8 *Scroll or swipe up or down to move between available lessons (swiping or scrolling left or right will not move screen)*

- 1 Return to dashboard
- 2 Click to play lesson
- 3 Adjust volume
- 4 Adjust play speed and quality

- 5 Full screen mode
- 6 To rewatch a lesson, click this button. When it disappears, hit play again.
- 7 Click to advance to next lesson, if you have already watched this lesson you may have to hit the MARK INCOMPLETE button first.

- MARK INCOMPLETE
- NEXT
- 6
- 7

Smartphone Best Use Guidelines

For best experience always hold the phone up and down when using the dashboard to select lessons and hold the phone sideways when using the course player to watch a lesson.

Dashboard Controls

Click to access menu

Click to return to dashboard

- 1 Click to begin playing lesson
- 2 Indicates lesson has been watched
- 3 Click to watch lesson
- 4 Click to advance to next lesson
- 5 *Scroll or swipe up or down to move between available lessons (swiping or scrolling left or right will not move screen)*

Course Player Controls

- 1 Return to dashboard
- 2 Click to play lesson
- 3 Adjust volume
- 4 Adjust play speed and quality
- 5 Full screen mode
- 6 To rewatch a lesson, click this button. When it disappears, hit play again.
- 7 Click to advance to next lesson, if you have already watched this lesson you may have to hit the MARK INCOMPLETE button first.

Basic Troubleshooting

If you are having any issues accessing the course, watching the lessons or navigating within the platform we recommend trying one or more of these troubleshooting solutions first:

- 1 Go to <http://www.refreshyourcache.com/en/home/> and try to refresh your cache. Sometimes browser caching causes problems.
- 2 Try accessing the course on a different browser (Chrome, Firefox, Edge, Safari, IE, Opera, etc). Sometimes the installation of your browser may be damaged. If it works on every browser but one, you can try reinstalling that browser.

Tip: We recommend using Google Chrome as your browser for our course (Chrome is one of the best programs for running online applications).

- 3 Try accessing and using the course on a different device or computer (mobile phone, tablet, PC/Mac laptop/desktop, etc.). Sometimes a certain device has trouble with a content type. This is rare but could be a problem.

If you are unable to solve your issue by using one of these fixes please email our platform support team at support@teendriverblueprint.com. They will get back to you as soon as possible.

Thank you for becoming an active part of your teen's driving success, we hope you and your teen find these courses as beneficial as we do!
